Table Q47 Page 245.....Q47. (a) America needs open markets & free trade practices. These are inherently good for the overall economy. (b) When it comes to trade, other countries have too great an advantage because they lack the enviro stds & worker protections we have. We should only open our markets to those who agree to honor these stds. (c) America should always adopt tariff & trade policies that protect its agricultural & industrial workers even if other countries can provide at lower costs

Table Q48 Page 249.....Q48. There's a proposed system called "cap and trade." The gov't would issue permits limiting the amount of greenhouse gases companies can put out. Companies that did not use all their permits could sell them to other companies. Supporters argue that many companies would find ways to put out less greenhouse gases, because that would be cheaper than buying permits. Opponents argue that this amounts to a huge tax on large companies. Would you support or oppose this system?

TEXAS LYCEUM POLL - 2009

Q45. Some people believe that the federal government should do what it can to help the US auto makers because those companies have a large impact on the economy and employ thousands of people. Others think that the country will be better off if these companies are allowed to succeed or fail on their own. Which is closer to your opinion?

TEXAS LYCEUM POLL - 2009

Q47. (a) America needs open markets & free trade practices. These are inherently good for the overall economy. (b) When it comes to trade, other countries have too great an advantage because they lack the enviro stds & worker protections we have. We should only open our markets to those who agree to honor these stds. (c) America should always adopt tariff & trade policies that protect its agricultural & industrial workers even if other countries can provide at lower costs

TEXAS LYCEUM POLL - 2009

Q47. (a) America needs open markets & free trade practices. These are inherently good for the overall economy. (b) When it comes to trade, other countries have too great an advantage because they lack the enviro stds & worker protections we have. We should only open our markets to those who agree to honor these stds. (c) America should always adopt tariff & trade policies that protect its agricultural & industrial workers even if other countries can provide at lower costs

TEXAS LYCEUM POLL - 2009

Q48. There's a proposed system called "cap and trade." The gov't would issue permits limiting the amount of greenhouse gases companies can put out. Companies that did not use all their permits could sell them to other companies. Supporters argue that many companies would find ways to put out less greenhouse gases, because that would be cheaper than buying permits. Opponents argue that this amounts to a huge tax on large companies. Would you support or oppose this system?

TEXAS LYCEUM POLL - 2009

Q55. The Texas legislature recently considered legislation stating that people have to provide photo ID in order to vote in Texas elections. Do you support or oppose voter ID legislation? Would that be strongly or just somewhat support/oppose?

TEXAS LYCEUM POLL - 2009

Q56. Recently, there are some debates about what rights should be afforded to same sex couples. Some favor civil unions which would give them access to healthcare, retirement, and other benefits given to married couples. Others argue that same sex couples should have the right to marry as well. Still others oppose affording either of these rights to same sex couples. Which is closest to your opinion?
